SOFTWARE DEVELOPER EXPERIENCE

USTRIVE | Remote | Austin, TX | February 2023 - May 2023 (Contract)
Full-stack Developer | Online Mentoring Platform

- Developed and maintained mentor and student portals
- Added and updated events to Mixpanel from the FE and BE to more accurately track mentor and student onboarding processes

MAPISTRY | Remote | Berkeley, CA | May 2022 - January 2023
Full-stack Developer | Environmental, Health and Safety Compliance, SaaS Platform

- Improved on existing dynamic form template generator and form submissions code
- Wrote SQL queries, ran migration scripts, and improved on class methods in the BE
- Contributed to the migration process of the FE stack of Javascript, Backbone, Marionette, Pug, React Context, React Redux, and Sass, to the new FE stack of Typescript, React, React Query, Styled Components, and MaterialUI, with guidance from UX/UI designer's Figma files
- Implemented Jest unit tests on the FE and Mocha unit tests on the BE to ensure code quality
- Created detailed PRs in GitHub with video snippets demonstrating fixes, functionality updates, or new features

READY | Remote | New Orleans, LA | June 2020 - May 2022
Front-End Software Engineer | Task-based Health Medical Records Client-facing Platform

- Implemented new features paired with Jest unit tests in the editable profile and patient encounters section of the app used by responders, supervisors, and clinicians
- Contributed to a 30+ reusable UI component library utilizing HTML/CSS and Styled Components, paired with Storybook and Jest unit tests to ensure code quality
- Contributed to the planning of feature tickets with product manager and their timely delivery in 2 week sprints
- Provided feedback to the UX/UI designer on feature design and followed Figma files
- Interviewed and evaluated 15+ candidates on technical screens
- Successfully transitioned product from the original tech stack of Javascript, React, GraphQL, and AWS Amplify, to the new tech stack of Typescript, React, GraphQL/Apollo Client

ERRUNDS | Remote | New York, NY | April 2020 - June 2020
Full-stack Developer Intern | Online Community Marketplace

- Implemented and contributed to the cart, past orders, and new user signup functionality and authentication
- Implemented cart screen features through the full-stack of the application using UX/UI designer's Figma files
- Implemented past orders screen display with order again button and functionality using appropriate GraphQL queries
- Tech stack: Javascript, React Native, React Redux, GraphQL/Apollo Client, Express, PostgreSQL, Sequelize, Node.js
